

Valencia College Continuing Education

Valencia's Professional Continuing Education division offers a variety of accelerated skills programs that help people start new (in demand) careers. With a large number of Baby Boomers retiring over the next 14 years, there is currently an unprecedented skill shortage in the workplace.

Valencia's accelerated skills programs are designed to teach students specific skills that help students gain employment in fields such as construction, 911 telecommunications, private security and manufacturing.

Fall 2016 Program Schedule:

Basic Construction Program – Future Dates to be Scheduled Soon
